PROFILE

Backend engineer with **2+ years** across Java and Node.js. Currently shipping **Spring Boot** APIs on AWS for a state-government infrastructure platform; previously optimised **Node.js / PostgreSQL** endpoints for an Indian news app serving millions of daily readers. Hands-on with AWS, Docker, and database tuning. Based in Berlin, EU Blue Card ready, available from **August 2026**.

PROFESSIONAL EXPERIENCE

Backend Developer

Jan 2025 — present

Neovant Advance Solutions · India (remote) · J&K Government PMU platform

- Designed and implemented **Role-Based Access Control (RBAC)** with Spring Security — tiered data access for thousands of administrative users.
- Built **Spring Boot REST APIs** on AWS (EC2, S3, RDS) with **Hibernate** ORM for cloud-hosted government services with strict audit and uptime requirements.
- Integrated **AWS Bedrock** for automated document analysis and real-time fraud detection in submitted reports.
- Shipped React components surfacing live project state from the API to non-technical stakeholders.

Freelance Backend + Relocation

2024

- Backend contracts in Node.js + PostgreSQL for Indian small businesses, alongside the move from Delhi to Berlin.

Backend Developer

Nov 2022 — Dec 2023

Avishkar.tech · Delhi · client: Amar Ujala (Hindi news, millions of daily readers)

- Optimised hot-path **PostgreSQL queries** and **Node.js / Express** endpoints under high-concurrency newsroom traffic.
- Built **JavaScript** webhook automation pipelines with **ElevenLabs** and **GoHighLevel** for AI-assisted publishing workflows.
- End-to-end in Agile sprints — design, implementation, code review, ship — with measurable latency and throughput improvements.

SELECTED PROJECTS

- request-inspector-service** — Live · inspector.poojadev.de · [source](#)
